## AN EYE FOR EXCELLENCE

Flowing into a landscape of natural beauty, IL MONTE GALALA spans over 2.24 million m<sup>2</sup> to lap a pristine 1.4 km shoreline, conceiving a global universe in its own right. With an eye for excellence and a pledge for originality, the project has been aesthetically designed in partnership with world-renowned Crystal Lagoons® to transform the rugged mountain surroundings into a floating beach paradise, introducing the world's first mountain-top crystalline lagoons rolling-out on 200,000 m<sup>2</sup>. Designed to offer an abundance of colourful experiences at different heights, IL MONTE GALALA has also collaborated with internationally acclaimed BCI Studio to offer an interactive world of retail and leisure. Wrapped in an ecologically sustainable context, while putting accessibility at its master plan's forefront, all of IL MONTE GALALA's zones are seamlessly interconnected by inclined elevators powered by Maspero Elevatori, in addition to intuitive paths and electric cars that add a fun and exciting flare to life.

Set over different altitudes and designed with varied communities in mind, each of IL MONTE GALALA's distinct zones reflect the unique character and environment of the site. From floating villas of unmatched opulence, elegantly appointed condos to cozy beach-front cabanas, IL MONTE GALALA is an international destination by choice, offering a world of contemporary living options and branded residences that combine functional beachside simplicity with the highest degree of luxury, inviting nature into every home.

AN EXCLUSIVE CUT ABOVE THE NORM

Drawing on the tradition with architecture that not only reflects the vital role of water, but also takes the wind-shaped form of the surrounding desert as its inspiration, the project has been aesthetically designed to transform urban Egyptian designs into an inviting contemporary Italian reality. Nestled into the site's dramatic landscapes, IL MONTE GALALA's inspired architecture affords total privacy for all residents, encompassing lush garden oases, vegetated rooftops and infinity pools, as well as uncluttered lagoon, mountain and sea views.

## A VIEW LIKE NO OTHER

---

The elemental beauty of IL MONTE GALALA's master plan lies in one simple rule: unobscured magical views for all and unmatched mountain-top exclusivity for everyone to enjoy. Built with a timeless familiarity with its iconic surroundings, IL MONTE GALALA gently rolls vegetated hills dipped in soft morning mist to greet the Red Sea's tranquil views; a graceful prelude to luxury living at its best. Wake up to breathtaking views of sapphire blues or simply take a dip in mountain-top lagoons, cascading to embrace the Red Sea's serene hues. Designed with your comfort and nature in mind, the project is carefully planned to maximise views by dividing the mountain's rugged landscape into "Seafront", "Mid-Level" and "High Altitude" zones, all seamlessly interconnected by flowing crystalline lagoons, flora and fauna, as well as wide and lush walk-ways.

## DESIGNED IN HARMONY WITH NATURE

---

By embracing the site's unique sense of place and environmental sensibilities, IL MONTE GALALA has managed to create a sustainable master plan, reinforcing the idea of going green in every detail. The project takes pride in implementing proactive sustainable initiatives that aim at conserving water, air, and energy without disrespecting the site's natural harmony.

By partnering with Environment and Development Group (EDG) for sustainable solutions, IL MONTE GALALA's housing units enclose vegetated rooftops, bringing water, sunshine and life to barren concrete. Solar panels are also an integral part of the site's planning, reinforcing the concept of renewable energy in this year-round sunny resort. Managing and reducing waste also comes as a top priority at IL MONTE GALALA, where reducing, reusing, and recycling are cornerstones that set a sustainable foundation that guarantees the project's longevity.

## WHY INVEST IN EGYPT?

Egypt is currently witnessing a remarkable boom in infrastructure, as well as a flourishing political atmosphere reflected on reduction of taxes, enhanced transparency for national budget, as well as newly implemented legislations designed for facilitating foreign investment, setting it as a top of mind destination for stable investment. The new phase of political development has witnessed streamlined investment procedures that aim at enhancing steady growth rates for property investors, while its strong economic growth is clearly reflected on a variety of sectors including tourism and the real estate market.

## STABILISATION OF EGP IS A POSITIVE SIGN FOR THE REAL ESTATE INDUSTRY.

The devaluation of the Egyptian Pound aimed to reduce the impact of unofficial currency channels and correctly account for currency inflows. Following a period of initial volatility, the currency has now stabilised at around EGP 18.2: USD 1. This stabilisation has attracted foreign investment flows on the back of greater economic optimism. Several contractual revisions have also occurred across the real estate sector that have alleviated the negative effects of increased activity costs on market participants.

In the Residential market, developers are introducing more efficient payment plans, increasing densities and reducing unit sizes in response to the negative impact of higher construction costs as input prices increased drastically.

In the Office market, most contracts were quoted in USD and rentals therefore effectively doubled following the currency floatation. Operating costs for office occupiers have been further inflated by increased import prices and pressure to increase wages. Many occupiers have

responded by seeking to optimise their performance through consolidation of their real estate holdings. Landlords are responding to the revised market conditions by capping USD rates, offering EGP leases or short term incentives to stimulate demand.

Retail contracts have also traditionally been quoted in USD. Retail tenants have faced numerous other obstacles such as import restrictions, increased prices of imported goods and reduced demand from consumers. To alleviate some of the pressures faced by tenants, some mall developers have agreed to cap the exchange rate whilst others have changed their quoting currency to EGP.

The Hotel and tourism industry has benefited greatly from the devaluation, as Egypt has become a more affordable destination for international tourists. With security issues addressed, travel bans removed and increased tourism promoting campaigns, demand is expected to pick up significantly.

## CAIRO PRIME RENTAL CLOCK

\* Hotel clock reflects the movement of RevPAR

Note: The property clock is a graphical tool developed by JLL to illustrate where a market sits within its individual rental cycle. These positions are not necessarily representative of investment or development market prospects. It is important to recognize that markets move at different speeds depending on their maturity, size and economic conditions. Markets will not always move in a clockwise direction, they might move backwards or remain at the same point in their cycle for extended periods.
